To Whom It May Concern:

In a highly publicized death in a small rural community, Dr. Oppenheim helped me to navigate through my first manslaughter case.

Without his guidance, it would have been nearly impossible to understand and comprehend the complexities of the autopsy report and forensic pathology that became the major, crucial issue in that case. His willingness to bring his expertise to small town, central Ohio and the force of his curriculum vitae were ultimately the tipping point which brought the case to a conclusion.

Amended from a second degree felony with a maximum penalty of eight years in prison to a first degree misdemeanor, punishable by, at most, 6 months in jail, my client spent a mere 48 days in the county jail awaiting his trial before he pled to the amended misdemeanor offense and was released back to the arms of his loving wife and his children. Such a result would not have been possible without Dr. Oppenheim, and I am truly grateful to him.

Sincerely,

**Adam C. Stone, Attorney and  
Counselor at Law, Ltd.**
